

Exhibit 12 to Complaint
Intellectual Ventures I LLC and Intellectual Ventures II LLC

**Example American Count 5 Systems and Services
U.S. Patent No. 7,324,469 (“’469 Patent”)**

The Accused Systems and Services include without limitation American systems and services that provide onboard WiFi in its airplanes; all past, current, and future systems and services that operate in the same or substantially similar manner as the specifically identified systems and services; and all past, current, and future American systems and services that have the same or substantially similar features as the specifically identified systems and services (“Example American Count 5 Systems and Services” or “American Systems and Services”).

On information and belief, the American Systems and Services provide onboard WiFi in its airplanes.

Wi-Fi and connectivity

Inflight Wi-Fi

Upgraded, high-speed Wi-Fi is available to buy on select domestic flights. Browse the internet, check emails and stream video services like Netflix, Hulu and HBO faster than ever before.

How to connect

American's domestic narrowbody aircraft are equipped with either Gogo 2Ku or ViaSat Ka, both satellite Wi-Fi products that operate via satellites in the sky instead of towers on the ground. Once onboard, customers can connect to American's Wi-Fi signal on their personal device. From there, customers can log in to the provider's portal and choose to purchase internet, watch free live TV or stream hundreds of other complimentary entertainment options.

U.S. Patent No7,324,469 (Claim 24)	
Claim(s)	Example American Count 5 Systems and Services
[24.pre] An Internet Hotspot comprising:	<p>To the extent this preamble is limiting, on information and belief, the American Count 5 Systems and Services include an Internet Hotspot.</p> <p>On information and belief, American has partnered with Intelsat, Viasat, GoGo, and Panasonic to provide its passengers with in-flight Wi-Fi connectivity.² American's aircrafts are equipped with Intelsat, Viasat, GoGo, and Panasonic's In-Flight Connectivity system.</p> <p>Wi-Fi and connectivity</p>  <p>Inflight Wi-Fi</p> <p>Upgraded, high-speed Wi-Fi is available to buy on select domestic flights. Browse the internet, check emails and stream video services like Netflix, Hulu and HBO faster than ever before.</p> <p>Source: https://www.aa.com/i18n/travel-info/experience/entertainment/wi-fi-and-connectivity.jsp.</p>

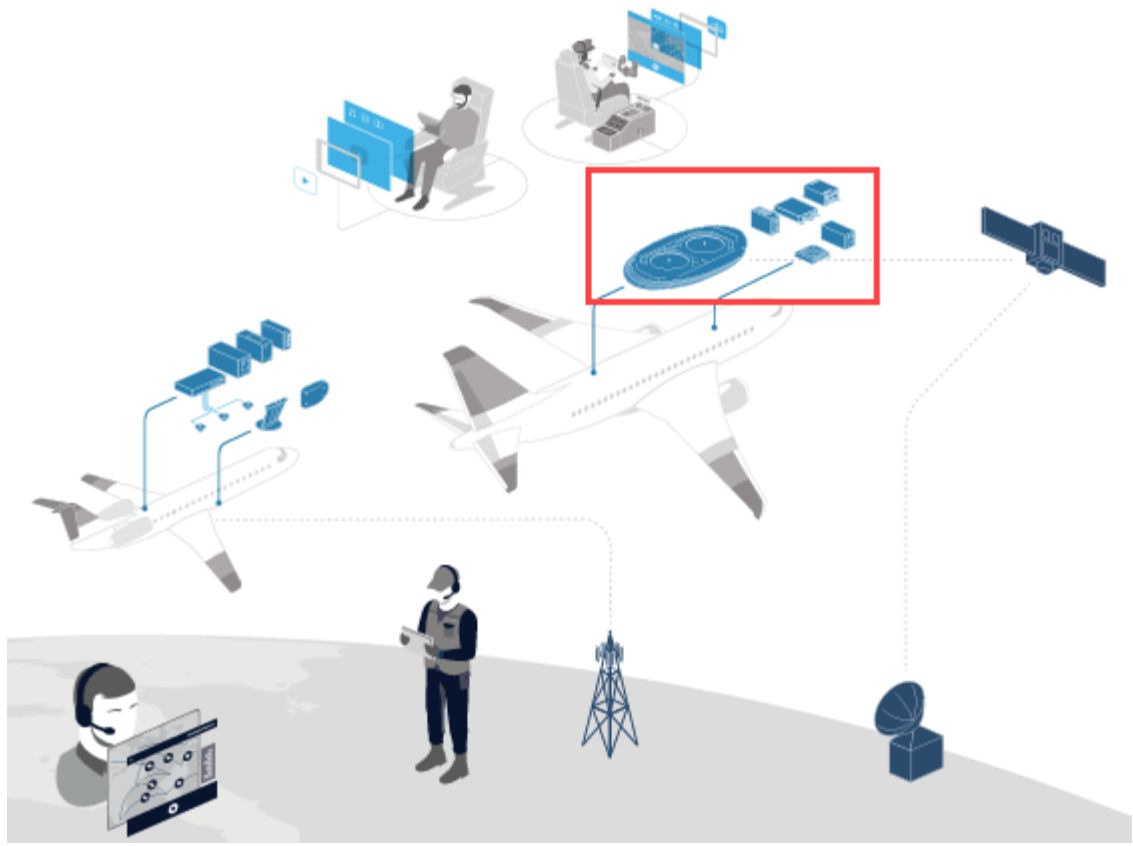

² Plaintiffs' identification of In-Flight Connectivity (IFC) providers is based on publicly available information. To the extent American uses other satellite-based providers for IFC, Plaintiffs reserve the right to investigate such implementations of IFC.

U.S. Patent No7,324,469 (Claim 24)	
Claim(s)	Example American Count 5 Systems and Services
[24.a] a satellite dish communicating with the Internet via one or more data links with a satellite;	<p>On information and belief, the American Count 5 Systems and Services include a satellite dish communicating with the Internet via one or more data links with a satellite.</p> <p>On information and belief, American's aircrafts are equipped for example with Intelsat's Global Connectivity system (GCS). Intelsat's GCS includes a satellite antenna mounted about the plane that communicates with the Internet using a satellite with a ground station.</p> <div data-bbox="611 524 1875 764"> <p> What is Wi-Fi Onboard (part of Intelsat)?</p> <p>With high-speed satellite Wi-Fi service provided by Wi-Fi Onboard (part of Intelsat), you can connect wirelessly to the internet using your personal electronic device like a laptop, tablet or smartphone.</p> </div> <p>Source: Support Home Page (aainflight.com).</p> <p>Intelsat Global Connectivity Solution</p> <p>The global coverage and scalable capacity of the Intelsat Global Network enables streaming-quality Wi-Fi and Live TV to the entire cabin. Our access technology features a unique dual-phased-array antenna and proprietary modem for unsurpassed performance and industry-leading system availability. Intelsat can also help you efficiently manage the bandwidth you need to provide the service you want so you get the most out of your investment.</p> <p>Intelsat's open architecture design leverages today's Ku-band satellites and offers future-ready performance with high-throughput satellites (HTS). This allows Intelsat Commercial Aviation to deliver on the coverage and capacity needs for commercial airlines with global flight routes today—and tomorrow.</p> <p>The Intelsat Commercial Aviation Portfolio delivers best-in-class inflight experiences through powerful, integrated onboard systems, aero networks, and support.</p> <p>Source: https://www.intelsat.com/wp-content/uploads/2021/07/21GO-055-Rebrand-PassengerExperience-v4.2.pdf.</p>

U.S. Patent No7,324,469 (Claim 24)	
Claim(s)	Example American Count 5 Systems and Services
	 <p>The diagram illustrates a communication system for an aircraft. At the top, two red boxes highlight a user interface with a person and a control room. Below these, a red box shows a satellite in orbit. A dashed line connects the satellite to a ground station on the ground, which is also highlighted in a red box. The ground station is connected to a network of servers and a person at a computer. The aircraft is shown in the center, with a dashed line connecting it to the ground station. The aircraft is also connected to a network of servers and a person at a computer. The diagram shows the flow of data between the aircraft, the ground station, and the satellite, with red boxes highlighting key components.</p> <p>Source: https://www.intelsat.com/wp-content/uploads/2021/07/21GO-055-Rebrand-PassengerExperience-v4.2.pdf.</p>

Claim(s)	Example American Count 5 Systems and Services
	<h1>Reliable, High-speed Inflight Internet — Everywhere, All the Time</h1> <p>The Intelsat 2Ku Onboard System includes all the onboard hardware and software needed to deliver inflight internet access to passengers around the globe.</p> <p>The heart of the system is the satellite access technology that includes two antennas—one for the forward link, which transmits data to the aircraft, and one for the return link, which receives data.</p> <p>Built to deliver significantly more bandwidth to aircraft, our high-throughput modem minimizes service disruptions associated with beam switching, allowing faster satellite handoffs and a more consistent passenger experience.</p> <p>Source: https://www.intelsat.com/wp-content/uploads/2023/06/SatelliteConnectivitySolutions2KuESA.pdf.</p> <div>Enable unique inflight experiences</div> <div>Connectivity and Entertainment Services</div> <ul style="list-style-type: none">• Wi-Fi internet packages for messaging, browsing, and streaming• Live TV: With the high bandwidth delivered by Intelsat 2Ku access technology, your passengers can watch live sports, news, or other live broadcasts on their own devices or the seatback• Seatback integration with existing third-party IFE systems: Integrate connectivity with existing seatback IFE systems to enhance the passenger experience <p>Source: https://www.intelsat.com/wp-content/uploads/2023/06/SatelliteConnectivitySolutions2KuESA.pdf.</p>

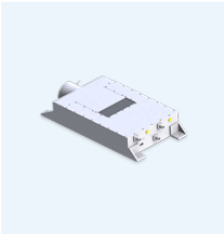

U.S. Patent No7,324,469 (Claim 24)	
Claim(s)	Example American Count 5 Systems and Services
	<p>Evidence to Intelsat is exemplary. On information and belief, satellite-based IFC solutions provided by Viasat, GoGo, and Panasonic practice this limitation for the same reasons that Intelsat does.</p>
<p>[24.f] wherein the user may authenticate the subscription account and access the Internet at the remote location by establishing a data connection between the web-ready device and the router.</p>	<p>On information and belief, the American Count 5 Systems and Services include WiFi where the user may authenticate the subscription account and access the Internet at the remote location by establishing a data connection between the web-ready device and the router.</p> <p>On information and belief, American passengers authenticate themselves on the american.com web portal to access in-flight Wi-Fi. The authentication completes when the user enters their login credentials on the portal. Limited free Wi-Fi is available to passengers, and upgraded high-speed WiFi is available to certain American members or can be purchased.</p> <p>Wi-Fi and connectivity</p>  <p>Inflight Wi-Fi</p> <p>Upgraded, high-speed Wi-Fi is available to buy on select domestic flights. Browse the internet, check emails and stream video services like Netflix, Hulu and HBO faster than ever before.</p> <p>Source: https://www.aa.com/i18n/travel-info/experience/entertainment/wi-fi-and-connectivity.jsp.</p>

U.S. Patent No7,324,469 (Claim 24)	
Claim(s)	Example American Count 5 Systems and Services
	<p>Pricing</p> <p>You can always access aa.com for free during your flight.</p> <p>Source: https://www.aa.com/i18n/travel-info/experience/entertainment/wi-fi-and-connectivity.jsp.</p> <div> <p>⌕ How do I connect to Wi-Fi Onboard (part of Intelsat) in flight?</p> <p>Use your Wi-Fi-enabled device to search and connect to the 'aainflight.com' Wi-Fi signal. If you're not redirected, open a browser and enter aainflight.com.</p> </div> <p>Source: https://support.aainflight.com/.</p> <div> <p>⌕ How do I connect to my American Airlines Wi-Fi Subscription Plan in flight?</p> <ol style="list-style-type: none"> 1. Enable Wi-Fi on your device 2. Search and connect to the 'aainflight.com' Wi-Fi signal 3. Launch your web browser and go to aainflight.com and select 'Log in' 4. Enter your AAdvantage number or username and password </div> <p>Source: https://support.aainflight.com/.</p> <p>On information and belief, upon authentication the user may access the Internet through onboard WiFi, where a connection is established with onboard software and/or hardware including a router.</p>

U.S. Patent No7,324,469 (Claim 24)	
Claim(s)	Example American Count 5 Systems and Services
	 <p>The diagram illustrates a satellite communication system. At the top, two people are shown in a control room, one operating a console and the other a laptop. Below them, a satellite is depicted in orbit, connected by dashed lines to two aircraft. One aircraft is shown in flight, while the other is on the ground, connected to a ground station. A red box highlights a central component of the system, which appears to be a satellite or a ground station. The diagram also shows a person on the ground using a handheld device, and a ground station with a large dish antenna. The entire system is connected by a network of dashed lines, representing the communication links between the various components.</p> <p>Source: https://www.intelsat.com/wp-content/uploads/2021/07/21GO-055-Rebrand-PassengerExperience-v4.2.pdf.</p>

U.S. Patent No7,324,469 (Claim 24)	
Claim(s)	Example American Count 5 Systems and Services
	<p>In-cabin Network</p> <p>The In-cabin Network consists of the essential airborne hardware that interfaces with aircraft access technology to power the passenger experience. The Onboard Server enables wireless content access via any device, including seatback screens over the dedicated In-cabin Network.</p> <div style="display: flex; justify-content: space-around; align-items: flex-start;"> <div style="text-align: center;">  <p>A791 MODMAN</p> <p>The A791 MODMAN serves as both modem and onboard server in Service Bulletin (SB) and Linefit (LF) configurations.</p> </div> <div style="text-align: center;">  <p>In-cabin axWAP</p> <p>Wireless Access Points provide the Wi-Fi signal to devices in the cabin and support the latest 802.11 standards, including 802.11ax.</p> </div> </div> <p>Source: https://www.intelsat.com/wp-content/uploads/2023/06/SatelliteConnectivitySolutions2KuESA.pdf.</p> <p>On information and belief, Intelsat offers WiFi solutions, used on American airplanes, that support satellite-based WiFi.</p>
